OBJECTIVE

Have the opportunity to develop myself professionally, putting my knowledge into practice and learning more and more. To do a good job as part of a team, thereby contributing to my professional growth and the institution I have been engaged with."

EDUCATION

- Internet Systems Technician.
Currently pursuing

- Exchange
A month studying English in Vancouver, Canada

- Alura
Programming foundation: HTML, CSS, JS and React

PROFESSIONAL EXPERIENCE

- 2023: Freelance.
Role: Developing and hosting responsive websites using HTML, CSS, and JS.

- 2023: GeoSapiens.
Role: Full Stack Developer at GeoSapiens (2023 - Present), working on the Coletum project with a focus on data collection development, utilizing PHP/Symfony for backend and TypeScript with React/Angular for frontend, implementing robust functionalities, creating responsive interfaces, and efficiently integrating components to ensure a smooth and high-performance user experience.

- 2024: Nelson Heusi Group.
Role: Full Stack Developer specializing in automation and data analysis solutions. Implemented advanced Web Scraping techniques to optimize critical processes, resulting in significant time and resource savings. Contributed to the enhancement of a corporate web portal by developing and integrating interactive dashboards with dynamic filters, enabling deeper and more intuitive data analysis for decision-making. Expertise spans both front-end (NextJs, Vue3, Vuetify) and back-end (Node, NestJS) development, demonstrating the ability to create comprehensive and efficient technological solutions from conception to implementation.

SKILLS

- Solid JavaScript/ Typescript development
- React/ Vue3/ NextJs
- Bootstrap/ Tailwind/ Vuetify
- NodeJs/ NestJs
- Self-taught
- Proactive
